

Vacancy Software Test Engineer.

Nobel Biocare: Nobel Biocare is the world leader in innovative restorative and esthetic dental solutions, providing dental professionals with state of the art evidence-based root-to-tooth solutions, including dental implants, all-ceramic crowns, bridges and laminates, guided surgery planning, scanners and biomaterials. At Nobel Biocare our mission is to be the most desirable partner in science-based solutions that help dental professionals to make a real and lasting difference to the well-being of their patients, empowering them to lead healthier and more satisfying lives. Nobel Biocare is listed on the SIX, Zurich under NOBN.

In Mechelen, the global Center of Competence for Guided Surgery of Nobel Biocare is located. In collaboration with the other global functions, the team investigates, develops, maintains and supports innovative solutions for Guided Surgery in the dental field.

Job Description: You assume the responsibility of testing in our software development process. You take care of thorough functional and unit software testing in a multiplatform application environment. You care about development of highly qualitative and robust software.

Your profile:

- You have a master in engineering (computer sciences, ICT, electronics).
- You have experience in software testing strategies and methodologies on various OS (Mac OS X, Windows versions)
- You know object oriented programming (C++, Qt) and web services.
- You are fluent in English.
- You are a persistent team player with good communication skills! Dynamic, responsible, eager to learn and problem solving are your key characteristics.

Our offer:

- A full time job as test engineer.
- Competitive wage, with interesting extra-legal options.
- An internationally oriented working atmosphere.
- A challenging leading edge and inspiring working environment.
